

**REMARKS**

Applicant respectfully submits that the present amendment and replacement drawings contain no new matter. The amendment merely corrects formal matters with respect to the drawings and specification without changing the scope of the claim. As such, Applicant respectfully submits that no additional search is required on the part of the Examiner and no additional material work other than a cursory review of the record is required on the part of the U.S. Patent and Trademark Office. Accordingly, Applicant respectfully requests that this Amendment be entered.

**In the Drawings**

The drawings are objected to as failing to comply with 37 C.F.R. 1.83(a) because the drawings do not show every feature of the invention specified in the claims. In particular, the Examiner notes that the ventilation grill and the double walls of steel and vinyl ester as recited by Claim 1 must be shown.

The Applicant has amended Figure 1 to include the feature of a grill, including adding a reference character 25 for identification. The appropriate paragraph in the Specification has been amended accordingly to include the reference character 25 and identify the figure in which reference character 25 is provided. Figure 7 has been amended to add the reference character 2 for additional identification of the double wall feature. Similarly, the appropriate paragraph in the Specification has been amended accordingly for clarification and identification of the figure in which reference character 2 is provided.

**Amendments to the Specification**

As mentioned above, the last full paragraph on page 3 and the fourth full paragraph on page 4 of the specification have been respectively amended for clarification in identifying the features in amended in Figures 1 and 7. The amendments were made in response to the drawing corrections suggested in the Examiner's Amendment.

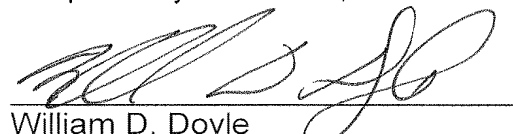

**Conclusion**

In view of the foregoing, allowance of Claims 1-6 and the prompt issuance of the Letters Patent are respectfully requested.

Should the Examiner believe anything further is desirable in order to place this application in better condition for publication, the Examiner is requested to contact the undersigned at the telephone number listed below.

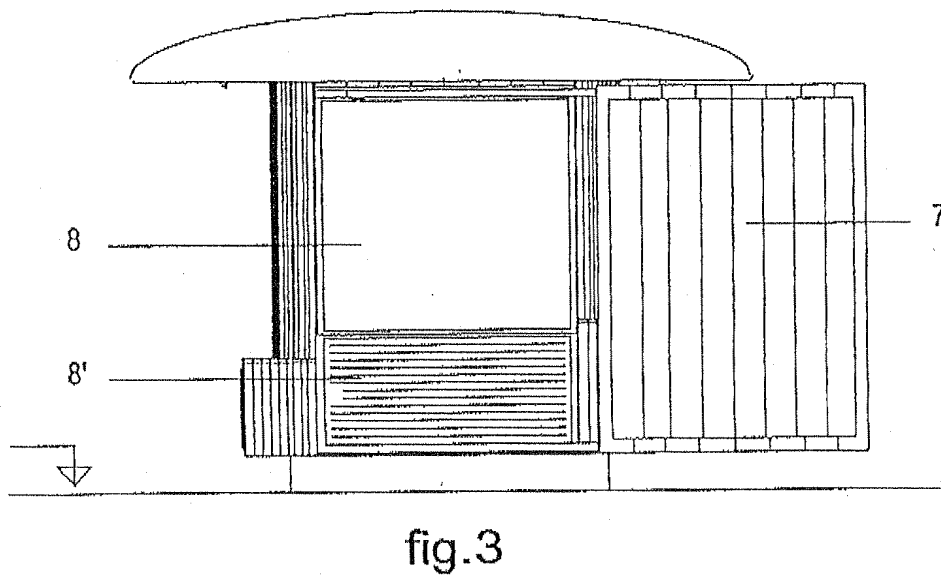

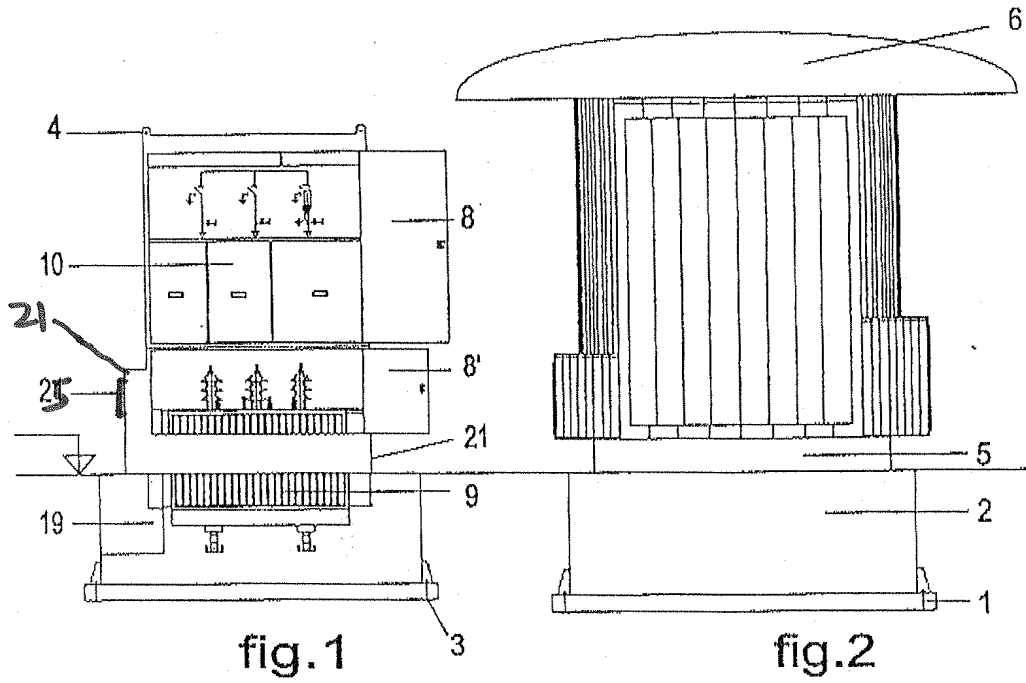

In the event this paper is not considered to be timely filed, the Applicant respectfully petitions for an appropriate extension of time.
